

Brittany's Spa Salon was originally opened as Brittany's Hair Specialists in 2002 by Brittany Molina. In 2006, the salon expanded with the addition of day spa services with the help of her new business partner, Esther Martinez and it was appropriately renamed Brittany's Spa Salon. The two sisters continue to grow their business together, paying close attention to detail and constantly improving the guest experience. The expansion allowed for more hairstylists and their new day spa, which today continues to offer many new and specialized services. The Jacksonville area is an ideal location for a spa salon such as this.

There are many distinctively different service advantages that allow Brittany's Spa Salon to be a unique beauty retreat in the Jacksonville area. A continuous commitment to advanced education is a top priority for the staff at Brittany's Spa Salon. Molina notes, "Going to cosmetology school is like going to a specialized high school. It is only the first step to begin a successful cosmetology career. To be a successful hairstylist, you must continue your education with a plan to keep learning." All licensed hairstylists at Brittany's Spa Salon attend more than 400 hours of continuing education per year. With ongoing advanced education being an absolute must, team members are always polishing their skills to ensure each guest with the best personalized services and products available. Their hair designers are also encouraged to participate in professional photography competition sessions with the hopes of being nationally and internationally published. They are also encouraged to continue their training in haircutting artistry, haircolor, hair extensions, formal upstyles and hair design artistry to help clients enhance their image with a full service beauty menu. To maintain an extremely high level of service, the hairstylists at Brittany's Spa Salon personally train under Brittany Molina for anywhere from three months to a full year before they are allowed to start performing services on their own clients. Spa professionals are also required to meet certain qualifications and certification standards before they begin to work in their spa rooms.

At Brittany's Spa Salon, they offer personal attention with a complete array of services for women, men and children. Brittany's Spa Salon is famous for their special expertise with SO.CAP.
